## **Reply to the Email Regarding Being Elected as a Foreign Academician of the Russian Academy of Engineering**

Dear B.V.Gusev,

I am writing to express my sincere thanks to you for your letter dated December 10<sup>th</sup>. It is a great honor to be elected as a Foreign Academician of the Russian Academy of Engineering (RAE), and I deeply appreciate your trust and recognition.

I currently serve as a member of the Communist Party of China (CPC) Committee and the Deputy General Manager of China Coal Mine Construction Group Corporation Ltd. (CCMCGC), and have been awarded the title of an Academic and Technological Leader. CCMCGC not only is a leading enterprise in mine construction in China, but also has strong technical strength and rich experience in international projects. Breakthroughs have been made in techniques of deep shaft construction, freezing and drilling. In recent years, our company has participated in large-scale mine design, construction and general contracting projects in more than 10 overseas countries such as Turkey, Thailand, Serbia, Congo (Brazzaville) and Uzbekistan, and has achieved good results.

With nearly four decades of experience in the field of mine construction, I have focused on technical breakthroughs and project management for deep vertical shafts under complex geological conditions. I have received one second-class National Science and Technology Progress Award and four first-class Provincial-level Science and Technology Progress Awards. The projects I led have won the "Luban Award" six times and the National Quality Engineering Award four times. I have also been honored with multiple awards, including the

"Mao Yisheng Science and Technology Award-Constructor Award", the "First Construction Master of China Coal Industry Engineering Project", and the "National Advanced Individual in Construction Industry Science and Technology Progress and Innovation".

I will continue to maintain a humble, pragmatic, and pioneering attitude toward lifelong learning to meet the new challenges in mine construction. Besides, I strive to play a bridging role in promoting technical exchanges and resource sharing between China Coal Mine Construction Group Corporation Ltd. and the Russian Academy of Engineering.

I sincerely invite you and other members of your esteemed academy to visit our company for inspection and cooperation. I look forward to working hand in hand with you to achieve outstanding results together!

Yours faithfully

Deputy General Manager of China Coal Mine Construction Group Corporation Ltd.

Xu Huidong
